TITLE : ORGANISM INFORMATION  
MEASURING DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To provide an organism information measuring device capable of easily and accurately measuring pulse waves in order to estimate the mental and physical conditions of a working person without the subject being conscious of measurement.

SOLUTION: This device includes a head kit part 2 in the form of a head set worn by a subject 1, and organism information measuring parts 3 and pad parts 4 for blocking external light, the parts 3 being located at the parts of the head kit part 2 making contact with ears, with sound holes 5 provided in the pad part 4 for preventing external sounds from being shut off. The subject 1 wears the head kit part 1 on the head and the organism information measuring parts 3 on the ears whereby the subject's organism information can be measured. As a result, pulse waves can be easily and accurately measured in order to estimate the mental and physical conditions of a working person without the subject 1 being conscious of measurement.
